Presentation title:	Connecting the Dots from SDGs to Enterprise-Level Sustainability and ESG: A Double Materiality Necessity	
<p>Connecting the dots from SDGs an all-embracing group of society-level goals and targets to enterprise-level sustainability and ESG factors with the concept of double materiality— stakeholder materiality and financial materiality.</p> <p>Depicting that the double materiality perspective provides a complete picture of the relationship between business and global sustainability, and the external impact of business activities. Emphasizing that choosing a few highly relevant (material) indicators can be valuable for developing a clear picture of a business' impact on society and the natural environment.</p>
