CV:

Thomas Lamnidis is distinguished lawyer with 39 years of international experience in various fields of expertise in large-scale energy, transport and infrastructure, privatization and investment projects in Europe, Southeast Europe, the Caucasus and Central Asia.

More than 25 years of his professional path he has been managing international energy and transport infrastructure projects. He has extensive experience in negotiations and bilateral and multilateral interstate agreements on highest political levels focused on energy and transport. He acted as Legal Advisor of the European Commission during the conceptualization, creation, development and implementation of the INOGATE Umbrella Agreement based on the Energy Charter Treaty principles and has assisted the transition countries in the development of the legislative reforms in the oil, gas and electricity sectors and the institutionalization of their respective legal regime.

Mr. Lamnidis has served as a legal advisor, Project Director and legal key expert in numerous international funded projects of European Commission, World Bank, European Bank for Reconstruction and Development, European Investment Bank, as well as the Greek State furnishing them tailored made legal solutions fully aligned with objectives of each project.

Apart of extensive expertise of the EU energy landscape and regulatory framework, he possesses in-depth knowledge of the Greek energy market, including its legislative and policy developments, the licensing framework, as well as the practical knowledge of all the obstacles that could arise and the means of overcoming them.

His key qualifications among others include preparation and drafting of secondary legislation required for operational permits for electricity, heating, oil and gas and RES; drafting of legal documents for power projects in Greece and abroad; Legal assessment on energy transactional documents; conformity check of various national energy laws with the EU Acquis on oil and gas, electricity and RES; Due diligence financing acquisitions on RES projects (wind, solar, hydro); Legal support for project finance for wind and solar projects etc.

Thomas Lamnidis has participated as a moderator and key speaker in numerous international conferences and workshops on energy, transport, trade and financial investment issues. (e.g. Athlos Energy's workshop on Nuclear Power Prospects for Greece; Foreign Affairs Institute Exploitation of Nuclear Energy in Greece, Balkan and Black Sea Petroleum Association's annual meetings, International Conference on Caspian Energy Issues, EBRD annual meetings, Ministerial Conference on Energy Issues, International Conferences held under the auspices of the ECONOMIST, European Commission Conferences, China - Europe Summit, Astana Economic Forum, Silk Road Summit, Institute of Energy for Southeast Europe, GE Summit Greece 2024 etc).
