November 22-23, 2024
Athens, Hellas

#	Charis Toloumis	
Title:	Head of Business Unit Smart Infrastructure Buildings for Greece, Siemens S.A. and responsible for Digital & Software for Business Unit Smart Infrastructure Buildings Lead Country Italy	
email:	charilaos.toloumis@siemens.com	•
Presentation title:	Digital Technologies and Future of Buildings	
<p>We examine the key megatrends currently shaping the building industry and the real estate economy, exploring how these trends influence the market and drive transformation. By taking a closer look at the global building stock, we analyze the current situation, identifying challenges and opportunities within the sector. Additionally, we delve into the pivotal role of technology, investigating how advancements are redefining the future of buildings to meet sustainability, efficiency, and functionality demands.</p>		
CV:		
<p>Charis Toloumis holds the position of the Head of the Buildings Business Unit in Greece which is part of Smart Infrastructure. The unit is a newly formed business unit which brings together all Siemens' buildings-related businesses into one entity. Prior to his current assignment, Charis was Head of Digital Solutions and Services business in Greece. His role involved strategic partnership-making, business development, and market coordination for the Siemens Xcelerator business platform across all Siemens business units. Furthermore, Chari has held various roles at Siemens Switzerland, including Global Product Manager and Project Manager in the field of engineering, Project management and Product management in the fields of digitalization and sustainability, where he successfully increased customer engagement and drove innovation through value creation. He holds an International Executive MBA from HSG St. Gallen, an MSc in Energy Engineering from ETH Zurich and a Diploma in Electrical & Computer Engineering from University of Patras.</p>
